

WEBSITE PICTURE POSTING PROCESS

29 Nov 2016

Early in 2016 (~ February) Google announced that they would no longer be supporting Picasa and that they would be moving on to Google Photos. Click on [Picasa to Google Photos](#) for details.

For use:

1. Go to <https://photos.google.com> and login

Note: The Sign In Login and Sign In Password are the same as those used for Picasa.

To get the Sign In Login and Sign In Password please send a request to webmaster@kactuskickers.org Please do not share this Login and Password with others.

Since Google Photos is much simpler than Picasa we are not going to provide detailed instructions for its use. If you have any problems, you can send a message to webmaster@kactuskickers.org for help.

2. Make sure that when you add albums that you label them using the following format:

Year-month-day-Brief description of hike-Persons first name and last name Initial submitting pictures

Example: 2013-06-16-Mt Baldy-Tom I

3. After you've created your new album and properly labeled it, share it with webmaster@kactuskickers.org after which it will be added to the website.
